

# The International Branch Campus – Models and Trends

*Going Global,  
Edinburgh, December 2006*

**Line Verbik, Deputy Director,  
Observatory on Borderless Higher  
Education, London, UK**

# This presentation

- Definition and rationales
- Scale and provision
- Models for branch campus establishments
- Trends and future scenarios

# Definition and Rationales

- Definition of branch campus:
  - Establishment operated in the name of the home institution
  - Students are awarded a qualification from the home institution
- Rationales for establishment: full control over provision, competitive edge in increasingly competitive TNE market, opportunities for external funding, regulations

# Scale and provision

- Scale
- Main exporters and importers
- Provision; subject areas, level, facilities, enrolments

# Models for branch campus establishment

- Model A: Wholly funded by the institution
- Model B: External funding
  - Primarily from the government in the host country
  - From organisations in the host or the home country
- Model C: Facilities provided

# Trends and Future Scenarios

- Increasing number of branch campus establishments (partly due to the changes in the transnational education market, such as increased competition, regulation and funding opportunities)
- Increased focus and awareness of risks and opportunities associated with these
- However, this type of provision is not likely to become the dominant type of delivery in the foreseeable future
